PROFESSIONAL SUMMARY

I am an IT professional with 5+ years of experience driving infrastructure modernization, security architecture, and operational leadership. Currently serving as the IT Systems Administrator at Rowan College at Burlington County, I partner with departmental leadership to guide IT strategy while managing a complex enterprise stack including MECM, Intune, Entra ID, Microsoft 365, Ellucian Colleague ERP, and Privileged Access Management.

My focus is on efficiency and innovation, demonstrated by my architecture of custom .NET enterprise solutions, including BaronOps to centralize endpoint management, and BaronGuard to automate zero-trust identity workflows and access control. I bridge the gap between technical infrastructure and end-user satisfaction by transforming manual maintenance into proactive, streamlined operations.

WORK EXPERIENCE

IT Systems Administrator

Rowan College at Burlington County

March 2024 – Present

Mount Laurel, NJ

- **Infrastructure & Security Leadership:** Manage critical on-prem and cloud infrastructure, including SCCM/MECM, Ellucian Colleague ERP, Office 365, and Deep Freeze. Architected the organization's first greenfield Microsoft Intune environment, establishing a hybrid SCCM co-management infrastructure to modernize endpoint provisioning. Spearheaded the organization-wide implementation of BeyondTrust PAM to enforce Zero-Trust standards across staff systems.
- **Identity Management & Security Automation:** Architected BaronGuard, a secure, zero-cost gateway for account management that replaces legacy systems without relying on proprietary third-party code. Engineered real-time data integrations to automate Entra ID actions and enforce mandatory three-point identity verification, streamlining workflows for OIT and Student Support staff while maintaining comprehensive audit logs for accountability.
- **Technical Support Services Leadership:** Selected to serve on the departmental leadership team, alongside the Director and Assistant Director, to guide IT strategic planning, process optimization, and workflow modernization during a critical transition from a multi-decade Managed Service Provider (MSP) to a new vendor.
- **Imaging & Deployment Automation:** Modernized device enrollment by implementing Microsoft Intune Autopilot provisioning workflows, alongside architecting standardized VMWare images for legacy SCCM deployments and automated driver update systems.
- **Endpoint Management Automation:** Architected a secure .NET 8/WPF administrative console named BaronOps that unifies SCCM, Active Directory, Deep Freeze, 25LIVE, and Sassafras APIs into a "Single-Pane-of-Glass" interface. Engineered a custom backend with embedded PowerShell SDK 7.4 to execute complex "Thaw-Deploy-Freeze" workflows in real-time, while enforcing "Defense in Depth" security via RBAC and zero-trust credential storage.
- **Esports & "Nuclear Lockdown":** Engineered a "Nuclear Lockdown" security model utilizing Shell Replacement, NTFS locking, and BeyondTrust to eliminate system breakout attempts. Orchestrated the ggLeap rollout for about 400 students, totaling 1,500+ usage hours in the first term.
- **Operational Intelligence:** Leveraged 25Live and Sassafras APIs to deliver high-fidelity usage visualizations to stakeholders, optimizing resource allocation and ensuring accurate reporting of active academic hours.
- **Support & Mentorship:** Resolve high-volume escalations via HappyFox and collaborate with vendors to minimize downtime. Serve as a peer mentor and author master technical SOPs for the lab infrastructure.

Advanced Repair Agent

Geek Squad

Oct 2020 – Nov 2024

Princeton, NJ

- **Diagnostics & Efficiency:** Resolved complex hardware and software failures within a strict 24-48 hour turnaround, sustaining a personal labor utilization rate exceeding 150%.
- **Client Communication:** Translated complex technical issues into clear user friendly solutions.
- **Operations & Compliance:** Maintained high-fidelity service records for seamless repair workflows while upholding a strict Zero-Loss data policy to guarantee client privacy.

EDUCATION

M.S. Cybersecurity & Information Assurance

Western Governors University
Feb 2027

B.S. Information Technology

Strayer University
Mar 2023

SKILLS

TECHNICAL PROFICIENCY

Systems: Windows Server · MacOS · Linux · iOS/Android · ChromeOS

Virtual/Remote: Hyper-V · VMWare · Proxmox · RDS · Parsec · ScreenConnect · VPN

Management: MECM/SCCM · Microsoft Intune · Active Directory · Microsoft Entra · Privileged Access Management · Deep Freeze · ggLeap · LabStats

Development: PowerShell · Python · Bash · C# 12 / .NET 8 (ASP.NET Core, SignalR) · REST APIs / Microsoft Graph · SQL · Git · HTML/CSS/JS

Applications: Ellucian Colleague ERP · M365 Administration (SharePoint, Teams) · Google Workspace · Zoom · VoIP · IIS

INFRASTRUCTURE

Security & Identity: Zero-Trust Network Security · Role-Based Access Control (RBAC) · OpenID Connect · Hybrid AD Writeback / SSPR · Firewalls · Access Control List · NTFS Locking · Shell Replacement

Networking: VLANs · Router Config · API Integration

Operations: Cloud Migration · Hybrid Co-Management · Imaging (CloneZilla/SCCM) · Backups · Hardware Maintenance · Advanced Troubleshooting

SOFT SKILLS & OPERATIONS

Service: Help Desk · Ticketing (HappyFox) · Customer Service · Conflict Resolution

Leadership: Vendor Management · IT Strategic Planning · Peer Mentorship · Crisis Management · Technical Writing

Core Skills: Problem Solving · Critical Thinking · Research · Adaptability · Organization · Time Management
